**DETAILED ACTION**

***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-10, 17-19, 23, 25, and 27, drawn to a method for molecular breeding of a plant and plant thereby produced.

Group II, claim(s) 11-16, 20-22, 24, 26, 28, and 31, drawn to a gene encoding an ADPAGPPase LS1 protein, a method of genetically engineering a plant and transgenic plant thereby produced.

Group III, claim(s) 32, drawn to an ADPAGPPase LS1 protein that controls sucrose starch metabolism.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

There is no special technical feature that links the plant of Group I with transgenic plant of Group III. Further, Group I and the method of genetically engineering a plant of Group II are distinct methods. Hence, Groups I, II, and III do not relate to a single general inventive concept.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
